PRESS RELEASE

Boskalis acquires inter-array cabling contract for Borkum Riffgrund 3 and Gode Wind 3 offshore wind farms

Papendrecht, 10 November 2021

Boskalis announces that it has been awarded an inter-array cable installation contract by Ørsted for the German Borkum Riffgrund 3 and Gode Wind 3 offshore wind farms. The contract includes the transport, installation and burial of a combined total of 106 inter-array cables.

The project will be executed with the Boka Ocean cable laying vessel. This 136-meter-long vessel was acquired earlier this year and will be equipped with a 4,000-ton turntable. Project preparations will commence shortly with cable installation activities scheduled for early 2024.

The Borkum Riffgrund 3 and Gode Wind 3 offshore wind farms will have a capacity of 900 MW and 242 MW respectively. Both wind farms are located off the northern coast of Germany in the North Sea. Combined, these two offshore wind farms are expected to deliver green renewable energy to approximately 1.2 million German households. The award of the contract is subject to a final investment decision by Ørsted.

Boskalis' strategy is aimed at leveraging on key macro-economic factors which drive worldwide demand in our markets: expansion of the global economy, increase in energy consumption, global population growth and the challenges that go hand in hand with climate change. This project is related to the development of generating renewable energy due to climate change and increasing energy consumption.

Royal Boskalis Westminster N.V. is a leading global services provider operating in the dredging, maritime infrastructure and maritime services sectors. The company provides creative and innovative all-round solutions to infrastructural challenges in the maritime, coastal and delta regions of the world. With core activities such as coastal defense, riverbank protection and land reclamation Boskalis is able to provide adaptive and mitigating solutions to combat the effects of climate change, such as extreme weather conditions and rising sea levels, as well as delivering solutions for the increasing need for space in coastal and delta regions across the world. The company facilitates the development of offshore energy infrastructure, including renewable wind energy. Boskalis is furthermore active in the construction and maintenance of ports, waterways, access

channels and civil infrastructure, thus helping to facilitate trade flows and regional socio-economic development. In addition, Boskalis is a global marine salvage expert and has a number of strategic partnerships in harbor towage and terminal services (Keppel Smit Towage and Smit Lamnalco). With a versatile fleet of more than 650 vessels and floating equipment and 9,900 employees, including associates, Boskalis is creating new horizons around the world.
